

LALOG FOR LAWSON UNIX/NT

Release Announcement

We are excited to announce the release of **LALOG™** for Lawson Software® on Unix and NT based platforms. We believe this product will set a *new* industry standard in how companies, specifically Lawson Software clients, track program usage. It is our mission to deliver this excitement to your company.

LALOG is a feature rich, fully integrated program-monitoring and statistic-gathering solution for your Lawson Software system. **LALOG** lets your company track and report on WHO is doing WHAT, in WHICH PROGRAMS, PRODUCTLINE, at WHAT TIME!! From DESIGN, to CODING, to TESTING, to IMPLEMENTATION, the highest degree of thought and planning has been placed into **LALOG**, providing clients with *flawless* performance. **LALOG** simplistic design offers maximum flexibility, with minimal complexity. Listed are just a few of our bullet point items that both define and set **LALOG** apart from every other USAGE-MONITORING system. Download our PowerPoint presentation for complete documentation. <http://www.midtechcorp.com/ic4/html/lalog.html>

The **LALOG** subsystem is fully compatible and integrated with Lawson Software Applications (6.x – 8.x) and Environments (2.x – 7.x), on both Unix® and Microsoft® NT/2000 platforms. All **LALOG** components come complete with online help text and examples. The components consist of a custom system code, proprietary and non-proprietary source code, screen and object rules, and more ... truly making it a complete, integrated solution for your company!
